OWNER'S MANUAL - BASIC SETUP DIMENSIONS & ASSEMBLY NOTES

OWNER'S MANUAL - GENERAL INFORMATION

FOR INDOOR USE ONLY
120V AC / 15AMP DEDICATED CIRCUIT REQUIRED

WARNING: Before assembly, visually inspect all heaters for any signs of damage. Excessive vibrations during transport may harm the heating elements. **DO NOT START** the sauna if any damage is detected. Contact Backyard Discovery for troubleshooting and replacement parts.

Replacement Parts: When replacement parts are needed, ensure they meet the manufacturer's specified requirements. Unauthorized substitutes may result in fire, electrical shock, or other hazards. Please contact Customer Service directly for the repair parts.

Note: Your sauna has been completely assembled and tested prior to packaging.

TWO adults are needed for assembly.

Choose a good indoor location to install the sauna:

- Location should be dry, level, well ventilated, temperature controlled and away from any source of water.
 - Do not install the sauna near water sources such as bathtubs, showers, wet basements, or swimming pools where water may splash on the sauna.
 - Main power cord must be easily accessible.
 - Ensure the power supply cord does not create a trip hazard and is not pinched by surrounding objects.
 - Do not use wall receptacle adapters, surge protectors, or extension cords between the sauna cord and the wall outlet.
-

Prolonged exposure is capable of inducing hyperthermia which occurs when the internal temperature of the body reaches a level several degrees above the normal body temperature of 98.6 °F. The symptoms of hyperthermia include an increase in the internal temperature of the body, dizziness, lethargy, drowsiness, and fainting. The effects of hyperthermia include:

- Failure to perceive heat;
- Failure to recognize the need to exit the room;
- Unawareness of impending hazard;
- Fetal damage in pregnant women;
- Physical inability to exit the room;
- Unconsciousness
- **WARNING** – The use of alcohol, drugs, or medication is capable of greatly increasing the risk of fatal hyperthermia.

GENERAL SAFETY WARNINGS:

- Do not install shower heads, plumbing fixtures, or taps in the sauna.
- Do NOT install electrical outlets inside or on the outside the sauna structure.
- Do NOT add locks or latches to the sauna door to prevent accidental entrapment.
- Do NOT tamper with, block, or move vents or sensors on or behind the sauna.
- **WARNING:** Permits may be required. Check local building codes before installing.
- **CAUTION:** To prevent fire, do not place any combustible materials on or near the sauna heater.
- At the end of each day, check that the sauna is turned off.
- No additional electrical receptacles should be installed inside or outside the sauna structure.
- Do not install any locking or latching mechanisms on the door to prevent accidental entrapment.
- If manually resettable temperature-limiting controls are frequently triggered, contact customer service and a qualified service provider.
- Do not tamper with, reposition, or cover vents or sensors on top of or behind the sauna.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.

To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

The device has been evaluated to meet general RF exposure requirement. To maintain compliance with RSS-102

- Radio Frequency (RF) Exposure guidelines, this equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body.

WOOD PARTS:

- Organize wood parts by the three-digit, alpha-numeric number stamped on each board (ex. P01).
- If there are multiple boards with the same stamped number, stack those pieces together.
- Stamps can be found on the flat surface of the boards or on the end of the boards.
- Allow yourself plenty of room - the wood pieces can take up a significant amount of space.

NOTE: CARTONS ARE NOT ORGANIZED BY PART OR STEP NUMBER.

HARDWARE PARTS:

- We recommend that you have a separate table to organize the hardware.
- Hardware bags are printed with a seven-digit, alpha-numeric part number.
- You can organize your hardware by part number or group by hardware type (e.g. bolts, nuts, etc.).
- During assembly you only need to reference the last four digits of the number.
