PRE-ASSEMBLY STEP 1 - SORTING PARTS

It is critical for ease of assembly that you take the time to sort and organize the metal and hardware.

METAL PARTS:

- Organize metal parts by the three-digit, alpha-numeric part label on each bag (ex. A01).
- If there are multiple parts with the same part label, stack those pieces together.
- Part labels can be found on the bags of the parts.
- Keep parts in bags until required step.
- Allow yourself plenty of room - the metal pieces can take up a significant amount of space.

NOTE: CARTONS ARE NOT ORGANIZED BY PART OR STEP NUMBER.

HARDWARE PARTS:

- We recommend that you have a separate table to organize the hardware.
- Hardware bags are printed with a seven-digit, alpha-numeric part number.
- You can organize your hardware by part number or group by hardware type (e.g. bolts, nuts, etc.).
- During assembly you only need to reference the last four digits of the number.

PRE-ASSEMBLY STEP 2 - TOOLS REQUIRED

Cordless Drill
or Electric Drill

Drill
